A NOTE ABOUT CORRECTIONS DATA

Items to consider when reviewing corrections data:

- Small changes in raw numbers between years may create large percentages. For example, a change from 7 to 3 creates a change of 57%. Review of both the raw numbers and percentages to determine the significance of these changes. Youth Services' reports include both measures, when available.
- Data in this report represents crimes that have a corresponding referral to the Lane County Department of Youth Services (Youth Services) which is the juvenile justice provider for the county. If a juvenile crime occurred that was not reported, or law enforcement did not create a referral regarding the crime, it is not included in these data. For example, it has been suggested that the number of "tobacco" referrals for juveniles is much lower than "what people know is occurring in their community." Data in this report represent only juveniles who have been referred for that offense.
- Reported juvenile crime data have benefits and limitations.

Benefits include:

- Determines juvenile crime trend over years
- Describes the proportion of different types of crimes, e.g., person versus property offenses or criminal versus non-criminal, etc.
- Compares county to statewide data

Limitations include:

- As stated above, data are based on reported crime. Interpreting these data out of the context of "victimization data" can be very misleading. For example, a reduction in *reported* crime is interpreted to mean "less juvenile crime" committed in the community and increases in these data are interpreted as a bad thing because they represent "more juvenile crime." These interpretations may be correct, however, there is no way to definitively confirm these assumptions without a victimization rate for the community. Without that rate, we do not know the extent to which reported crime reflects absolute crimes committed in the community.
- Referral data are a weak representation of the impact of the corrections system for several reasons including a) they are influenced by local reporting practices, b) they are influenced by the number of law enforcement officials, and c) the majority of juvenile offenders each year are first time offenders. Recidivism measurements (re-offending behavior) are less vulnerable to these external influences and serve as a stronger measurement of system and program impact. Youth Services has produced a comprehensive review of these data which can be found on its web page.

FINDINGS IN BRIEF

The following are highlights of data in this report. More detailed information is provided in the sections to follow.

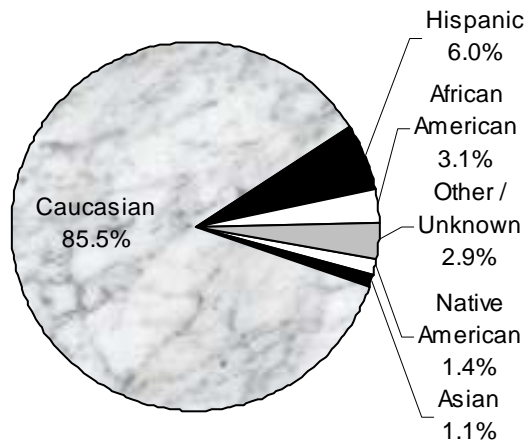

- Reported juvenile crime in 2007 increase by two youth when compared to 2006
- Lane County's rate for juvenile delinquency is very similar to the statewide rate
- The majority of juvenile offenders are Caucasian males who have an average age of 14 years. The majority of their crimes are property crimes.

In 2007, there were 1,984 individual juvenile offenders in Lane County. Those individuals were referred by law enforcement to the juvenile department 2,749 times for 4,307 crimes. On average, each youth committed 2.2 crimes.

Individual Juvenile Offenders N = 1,984

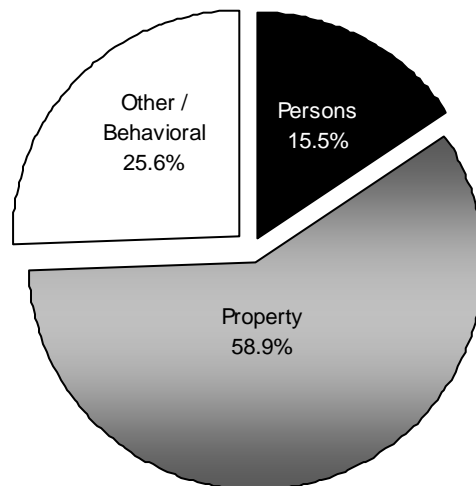

- African American = 3.1% (62)
- Asian = 1.1% (21)
- Caucasian = 85.5% (1,697)
- Hispanic = 6.0% (119)
- Native American = 1.4% (27)
- Other/Unknown = 2.9% (58)

- Male = 65.9% (1,307)
- Female = 34.1% (677)

Juvenile Referrals N = 2,749

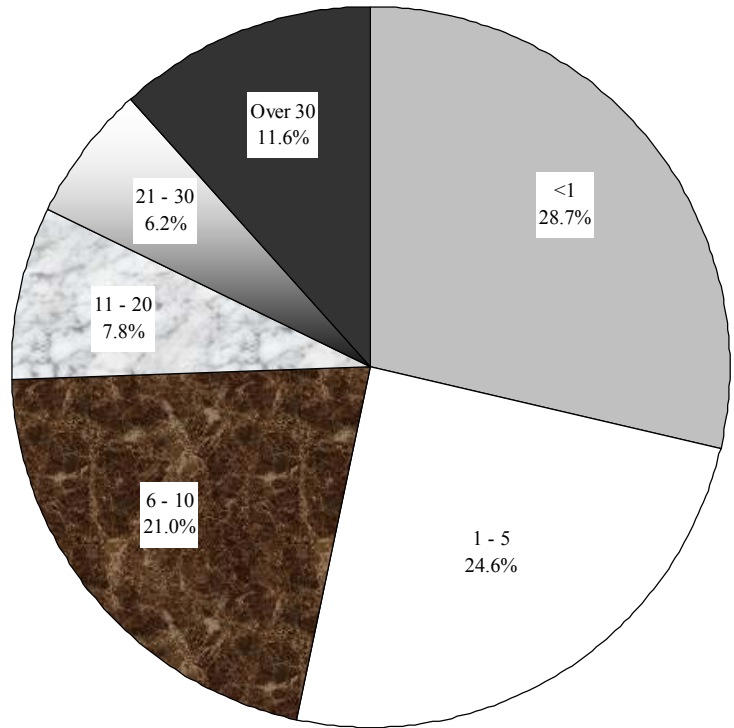

- Criminal = 66.1% (1,818)
 - Person = 15.5% (282)
 - Property = 58.9% (1,071)
 - Other/Behavioral = 25.6% (465)
- Non-Criminal = 33.9% (931)

Lane County Juvenile - Secure Confinement

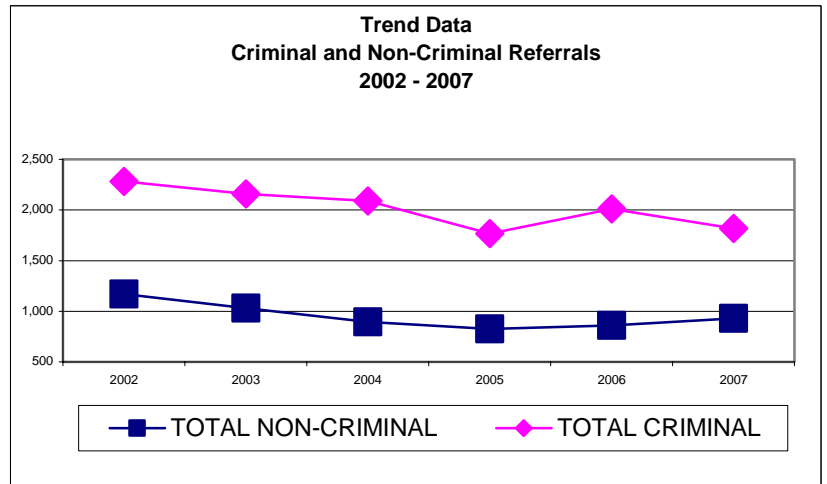

There were 881 admissions to the Lane County Detention facility (intake, detention, and youth care center).

- 28.7% (253), < 1 day
 - 24.6% (217), 1-5 days
 - 21.0% (185), 6-10 days
 - 7.8% (69), 11-20 days
 - 6.2% (55), 21-30 days
 - 11.6% (102), Over 30 days
- Male = 77.5% (683)
 - Female = 22.5% (198)
- African American = 5.7% (50)
 - Asian = 2.2% (19)
 - Caucasian = 72.4% (638)
 - Hispanic = 11.8% (104)
 - Native American = 3.9% (34)
 - Other/Unknown = 4.1% (36)

Trend Data: 2002-2007

- Referrals decreased in Lane County between 2002 and 2007 by 20.3% (3,451 to 2,749)
 - 8.7% reduction in juvenile person referrals (309 to 282)
 - 30.8% reduction in juvenile property referrals (1,547 to 1,071)
 - 9.2% increase in juvenile “other/ behavioral” referrals (426 to 465).
 - 20.4% reduction in non-criminal referrals (1,169 to 931)

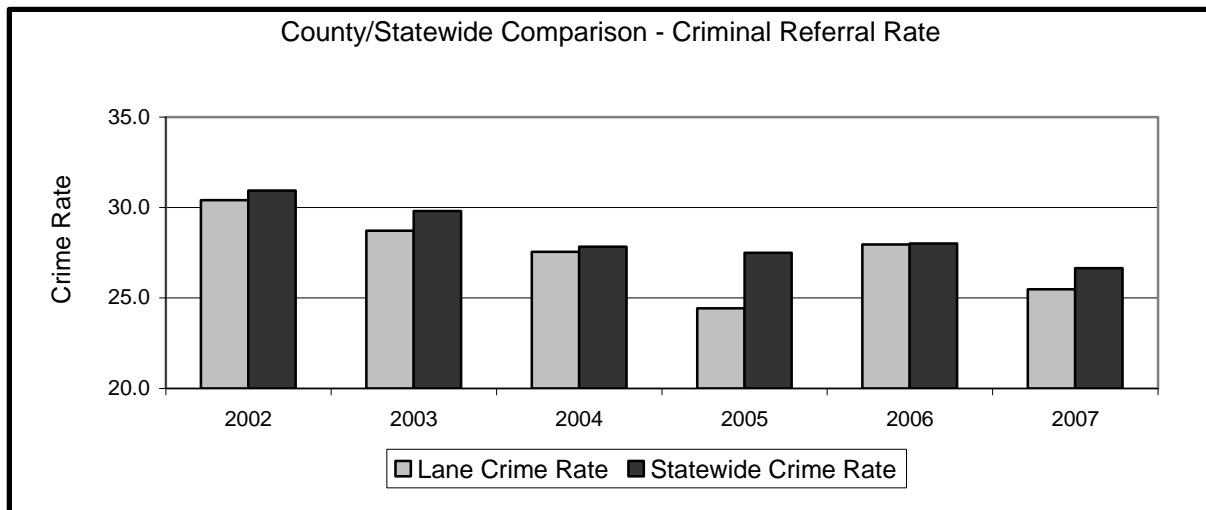

2007 Referral Data Compared to Previous Five-Year Average

Crime by Category has decreased in 2007 for Person, Property and Non-Criminal referrals, whereas “Other” crime increased when compared to the previous five-year average ('02-'06).

Category	'02-'06 Five Year Average	2007	% Change
Criminal			
Person	301	282	-6.3%
Property	1,299	1,071	-17.6%
Other	462	465	0.6%
Non-Criminal	957	931	-2.7%
Total Referrals	3,018	2,749	-8.9%

Lane County/Statewide Comparison Referral Rate for 2002-2007

- Both Lane County and statewide data show a decrease for the criminal referral rate (rates adjust for changes in population) between 2002 and 2007.
- The rate for property referrals in Lane County decreased from 20.6 in '02 to 15.0 in '07 (27.2%). The statewide rate decreased from 17.6 to 14.8 (15.9%).
- The rate for person referrals in Lane County decreased from 4.1 in '02 to 4.0 in '07 (2.4%). The statewide rate decreased from 5.5 to 4.6 (16.4%).
- The rate for other/behavioral referrals in Lane County increased from 5.7 in '02 to 6.5 in '07 (14.0%). The statewide rate decreased from 7.8 to 7.3 (6.4%).

REPORT DESCRIPTION

Background - The Lane County Department of Youth Services (Youth Services) is the juvenile justice provider for Lane County, Oregon. Historically, Youth Services has published an annual report that included:

- A departmental overview
- An overview of the philosophy of corrections and treatment interventions for juvenile offenders
- A description of juvenile justice
- Trend data on juvenile crime
- Budget totals (county tax dollars and grant funds)
- A summary data on recidivism (re-offense) trends.
- A literature summary of best practices

While it is important to report on each of these areas, the information on each topic has increased to the point that it is no longer feasible to put it all in one document. Instead, Youth Services will produce separate reports per topic in addition to other research information. These separate documents allow for more detailed information on each topic and more clearly respond to users' specific areas of interest

Report Purpose - This report includes data related to the reported juvenile crime in Lane County. It includes both single year data and trend information. These data are provided by totals, gender, age, race and ethnicity. All data are maintained on the statewide Juvenile Justice Information System (JJIS).

Definitions - This report is divided by counts of individual youth, their referrals and allegations, definitions include:

Data Type	Description	Example	How Reported
1. Youth	1. Individual juvenile offenders referred to Youth Services. Each youth is only counted once per year.	<i>John Smith is an individual juvenile.</i>	Youth = 1
2. Referrals	2. Reports (usually a police report) that contain incidents of criminal or status offenses committed by juveniles. An individual youth can have several referrals.	<i>On January 15, 2007, the police sent a referral on John Smith to Youth Services. The referral included the following allegations: Theft 1 and Criminal Trespassing.</i>	Referrals = 2
3. Allegations	3. Includes the type and number of crimes listed on the referral. A referral can have several allegations.	<i>On March 20th, 2007, the police sent a referral on John Smith to Youth Services with the following allegations -Theft 3, Criminal Mischief 2 and Arson 2.</i>	Allegations = 5

YOUTH

Definition – “Youth” are individual juvenile offenders referred to Youth Services. Each youth is only counted once per year.

Summary of Youth Data – A brief overview of demographic information, youth criminal activities, trend information and statewide comparisons is provided in this section. Detailed tables and charts on these data follow this overview.

There were 1,984 individual juvenile offenders referred to Youth Services in 2007. The majority of the youth referred were Caucasian 85.5% (1,697) and male 65.8% (1,307).

Total Youth N = 1,984		
Race/Ethnicity	Age	Gender
<ul style="list-style-type: none"> • African American = 3.1% (62) • Asian = 1.1% (21) • Caucasian = 85.5% (1,697) • Hispanic = 6.0% (119) • Native American = 1.4% (27) • Other/Unknown = 2.9% (58) 	<ul style="list-style-type: none"> • 12 and younger = 8.7% (173) • 13-15 years = 41.1% (816) • 16 and older = 50.2% (995) 	<ul style="list-style-type: none"> • Male = 65.9% (1,307) • Female = 34.1% (677)

Of the total youth referred (1,984) 1,425 were referred for criminal offenses.

- Person Crimes = 12.1% (240)
- Property Crimes = 41.8% (829)
- Other/Behavioral Crimes = 17.9% (356)

- Criminal Offenses = 71.8% (1,425)
- Non-Criminal Offenses = 28.2% (559)

Youth with Criminal Offenses (N = 1,425)	Youth with Non-Criminal Offenses (N = 559)
<ul style="list-style-type: none"> • 16.8% (240) person crimes • 58.2% (829) property crimes • 25.0% (356) other/behavioral crimes – substance/alcohol, disorderly conduct, forgery, harassment, weapons, etc. 	<ul style="list-style-type: none"> • 76.0% (425) substance/alcohol violations • 7.3% (41) runaway • 4.5% (25) curfew • 5.9% (33) tobacco violations • 2.9% (16) interstate compact • 3.4% (19) local ordinance or other violations

Person, property and non-criminal offenses by category have decreased in 2007 whereas “other/behavioral” crime increased when compared to the 2002 data from five-years ago. Data include:

- Youth with criminal offenses decreased 12.9% (1,636 to 1,425)
 - The number of juvenile offenders with person crimes decreased 8.0% (261 to 240)
 - The number of juvenile offenders with property crimes decreased 21.7% (1,059 to 829)
 - The number of juvenile offenders with other/behavioral crimes increased 12.7% (316 to 356)

- Youth with non-criminal offenses decreased 13.2% (644 to 559)

Both Lane County and the state experienced a decrease in the rate at which youth were referred to juvenile departments. A comparison between Lane County rates and statewide rates for 2002-2007 includes:

- Rates are based on youth referred to juvenile departments per 1,000 youth in the general population (0-17 age group). Analyzing per capita (rate) data removes the effect of a changing population and simplifies trend comparisons and comparison between groups.
- Youth referred for criminal offenses, Lane County’s rate decrease was very similar to that experienced statewide. Lane experienced a decrease of 8.3% (21.8 in ’02 and 20.0 in ’07) and the state decreased 10.9% (22.1 to 19.7).
- Youth referred for non-criminal offenses, Lane County’s rate and the statewide rate decreased. Lane experienced a decrease of 9.3% (8.6 in ’02 and 7.8 in ’07) and the state decreased 1.4% (14.7 to 14.5).
- Youth referred for person crimes, Lane County’s 2007 rate was (3.3 per 1,000 youth) is very similar to, and slightly less than, the statewide rate (4.0).
- Youth referred property crimes, Lane County’s 2007 rate was 11.5 and the statewide rate was 10.8. Both have experienced a downward trend since ’02. Lane went from 14.0 in ’02 to 11.5 in ’07 (17.9%) and the statewide rate went from 12.2 to 10.8 (11.5%).
- Youth referred other/behavioral crimes, Lane County’s 2007 rate was 5.0 and the statewide rate was 5.2. Lane increased from 4.2 in ’02 to 5.0 in ’07 (19.0%) while the statewide rate decreased from 5.6 to 5.2 (7.1%).

REFERRALS

Definition - A referral is a report from law enforcement officials that contains incidents of criminal or status offenses committed by juveniles. The previous section contained data related to individual youth. Each youth can have more than one referral to the juvenile department during the year.

Summary of Referral Data – A brief overview of types of referrals, trend information and county/state comparisons are provided in this section. Detailed tables and charts on these data follow this overview.

- In '07, 1,984 individual juvenile offenders had 2,749 referrals to Youth Services. The majority of those referrals were criminal 1,818 (66.1%) versus non-criminal 931 (33.9%). Of the criminal referrals most were property crimes 1,071 (58.9%), 465 were other/behavioral crimes (25.6%) and 282 were person crimes (15.5%).

Criminal Referrals (N = 1,818)	Non-Criminal Referrals (N = 931)
<ul style="list-style-type: none"> • 15.5% (282) person crimes • 58.9% (1,071) property crimes • 25.6% (465) Other/Behavioral crimes – disorderly conduct, harassment, public order, substance/alcohol, weapons, etc. 	<ul style="list-style-type: none"> • 72.5% (675) substance/alcohol violations • 8.8% (82) runaway • 9.2% (86) tobacco violations • 4.6% (43) curfew • 1.8% (17) interstate compact • 3.0% (28) local ordinance or “other” referrals

Just as the number of youth referred for person, property and non-criminal offenses by category have decreased in 2007 and “other/behavioral” crime increased when compared to the 2002 data from five-years ago, so did their referrals. Data include:

- Youth with criminal offenses decreased 20.3% (2,282 to 1,818)
 - The number of juvenile offenders with person crimes decreased 8.7% (309 to 282)
 - The number of juvenile offenders with property crimes decreased 30.8% (1,547 to 1,071)
 - The number of juvenile offenders with other/behavioral crimes increased 9.2% (426 to 465)
- Youth with non-criminal offenses decreased 20.4% (1,169 to 931)

Data for 2007 referrals as compared to the previous five-year average include:

- Total criminal data decreased in 2007 from the previous five-year average except for the following crimes:

	'02-'06 Five Year Average	2007	% Change
Coercion	2	10	400.0%
Robbery	16	22	37.5%
Substance/Alcohol	177	209	18.1%
Property Other - littering; mail related	13	14	7.7%
Weapons	36	37	2.8%

Trend: County/State Comparison Includes (2002 - 2007):

- The referrals rate for criminal referrals decreased between '02 and '07 for both the state and for Lane County.
- The rate for person referrals in Lane County went from 4.1 to 4.0 (2.4% reduction). The statewide rate went from 5.5 to 4.6 (16.4% reduction).
- The rate for property referrals in Lane County went from 20.6 to 15.0 (27.2% reduction). The statewide rate went from 17.6 to 14.8 (15.9% reduction).
- The rate for other/behavior referrals in Lane County went from 5.7 to 6.5 (14.0% increase). The statewide rate decreased from 7.8 to 7.3 (6.4% reduction).

Referral data (2,749 referrals) for residence areas includes:¹

- 47.2% (1,298) in Eugene
- 24.4.% (671) in Springfield
- 8.3% (229) in Cottage Grove
- 2.8% (77) Oakridge
- 2.6% (71) in Junction City
- 2.2% (60) in Florence
- 12.5% (343) in all other areas

¹ The statewide database does NOT track location of juvenile crimes. Instead, it lists residence area of each offender (at the time of the referral). Hence these data reflect resident city of juvenile offenders--not where they committed their crimes.

ALLEGATIONS

Definition – Allegations include the type and number of crimes committed by juvenile offenders as reported on the referral. A single referral can have several allegations. The term is similar to juvenile “offenses” and juvenile “crimes.”

Data on allegations are not as extensive as those on youth and referrals in this report. It does include data for 2007 based on demographic information and type of crime along with a trend summary of Lane County data between 2002 and 2007.

Summary of Allegation Data – There were 4,307 allegations in 2007.

Just as the number of youth and their referrals has decreased over time, so has the number of allegations on those referrals.

Criminal Allegations (N = 2,954)	Non-Criminal Allegations (N = 1,353)
<ul style="list-style-type: none"> • 18.6% (549) person crimes • 55.2% (1,631) property crimes • 26.2% (774) other/behavioral crimes 	<ul style="list-style-type: none"> • 64.8% (877) substance/alcohol violations • 6.2% (84) runaway • 11.1% (150) tobacco violations • 7.9% (107) curfew • 3.4% (46) graffiti • 1.7% (23) interstate compact • 4.9% (66) local ordinance or “other” allegations

2007 allegation data compared to 2002:

- Allegations decreased 15.5% (from 5,099 to 4,307)
- The number of allegations for person crimes increased 16.3% (472 to 549)
- The number of allegations for property crimes decreased 28.7% (2,289 to 1,631)
- The number of allegations for other criminal offenses increased 1.7% (761 to 774)

DETENTION

Description – The goal of the juvenile detention facility is to protect the community by providing a safe and secure environment for delinquent juveniles within which staff can facilitate changes in criminal behavior. Detention provides the following diverse services:

- Keeping a secure physical setting and preventing juveniles from escaping
- Preventing physical violence, intimidation, extortion or threats toward staff, juveniles, parents or any others
- Preparing juveniles for placement at treatment facilities
- Providing an education component, which ensures that no juvenile is deprived of an appropriate education opportunity due solely to his/her detention status
- Providing appropriate, timely and effective intervention strategies specifically designed to: a) recognize and encourage positive lawful behavior and change, b) modify inappropriate behavior/attitudinal manifestations, and c) induce and encourage general personal growth
- Providing meaningful activities and discussion group experiences
- Promoting family communication
- Engaging in a continuous search for innovative means of providing effective short-term institutional care

Summary of Lane County Detention Data – Data for Lane County’s juvenile secure confinement are based on length of stay.

There were 881 admissions in 2007. Of those:

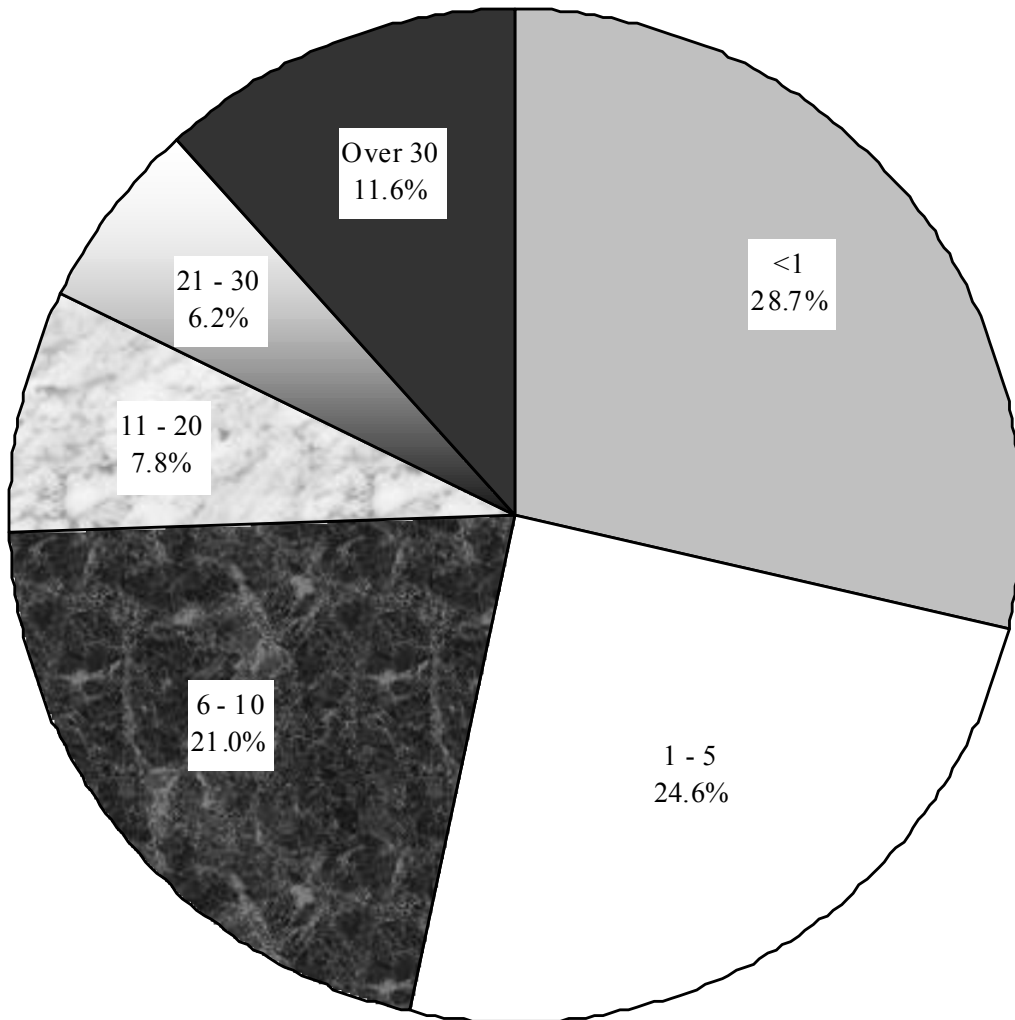

- Female = 22.5% (198)
- Male = 77.5% (683)

- African American = 5.7% (50)
- Asian = 2.2% (19)
- Caucasian = 72.4% (638)
- Hispanic = 11.8% (104)
- Native American = 3.9% (34)
- Other/Unknown = 4.1% (36)

- 28.7% (253) stayed less than one day
- 24.6% (217) stayed between 1 and 5 days
- 21.0% (185) stayed between 6 and 10 days
- 7.8% (69) stayed between 11 and 20 days
- 6.2% (55) stayed between 21 and 30 days
- 11.6% (102) stayed over 30 days
